**FLAME PROOFING**

## TECHNICAL DATA SHEET

### PAPER AND CARDBOARD FLAME RETARDANT

- DESCRIPTION:** Paper and Cardboard Flame Retardant is an ammonium sulfamate non-durable flame retardant.
- APPEARANCE:** Light Orange colored liquid that dries clear.
- USE:** Paper, un-waxed cardboard, and other similar materials
- FINISH:** Leaves no residue
- APPLICATION:** Spray, brush or dip. Perform tests to determine appropriate soaking time or quantity required to achieve effective treatment.
- MIX RATIO:** Premixed, do not dilute.
- HAZARD:** May cause skin and eye irritation to sensitive people; apply in a well-ventilated area.
- COVERAGE:** Estimated 400 square feet per gallon.
- DRYING:** Machine or air dry.
- COMPOSITION:** Ammonia - 1.0%  
Boiling Point - 212 °F                      PH - 6.7 to 7.1  
Specific Gravity - 1.15
- RATING & TEST APPROVALS\*:** NFPA 701-96                      NYC Test Bull. #44  
CSFM C-139.01                      NYC FD Cert of Approval #5022  
NYC BSA 1177-65-SM
- ADVANTAGES:** Non-toxic made of natural inorganic salts. Water based and easy to apply.
